INDUSTRY EXPERIENCES

Borealis AI – **Canada, Toronto** May 2020 – August 2020
Research Intern, Alan Team Advisor: Yanshuai Cao

- Build a distributed data-parallel Text-to-SQL system.
- Applied meta-learning algorithms (MAML, Reptile, MetaReg) in cross-database semantic parsing task.
- Achieved promising results in the zero-shot domain transfer setting.

IBM Research – **China, Beijing** September 2018 – June 2019
Research Assistant Intern, Information Analytics Team Advisor: Shiwan Zhao

- Chinese word segmentation: responsible for training Chinese word segmentation model. Proposed a novel segmentation model based on n-gram and information entropy to segment the input sentences.
- Neural Architecture Search: PyTorch implementation of Google's ENAS neural architecture algorithm.
- Migrated a neural network model which is implemented in Keras into Java environment using Deeplearning4j.
